

FREEZE THE WINNING REELS

Let the reels freeze. It's bloody warm inside so might as well let some freezing winds, sorry wins, come in. This classic slot comes from none other, than one of the coldest places on earth, Finland. Freezing, frozen, freeze fit perfectly with anything Finland and our team proudly sweated the hours to churn out this freezing winter themed video slot. A slot designed to make you win, come rain or shine, or rather, come heat or freeze. Maybe a freeze is better, and may the reels on your next spin freeze so bad, that you lose track of the wins not your toes.

The FREEZING REELS are the key feature. With a medium volatility and 5000x max exposure, placing your bet can land you in a (frozen) sweet spot. Just land the FROZEN SNOWFLAKE wild symbols on adjacent reels! Those same reels stay frozen. The wilds substitute for other symbols, and the more reels you freeze, the longer they stay frozen. Keep in mind, that with each frozen reel, comes a bigger chance of hitting the winner line, as you reduce the reels needed to hit a win! Freeze all the reels, and you get MYSTERY GAMES that release the reels from the ice, and all wins you land will give the max possible win!
