

# MAYAN DICE

## THE MAYAN WAY

There's no mystery, the Mayan chief is waiting for your spin. He's a welcoming leader that's all in, for your next win! Just start spinning the reels, and aim to hit a win line with the higher digit dice, or even better, with a SCATTER or BONUS. Landing, at least three of such, on a left to right win line, opens up a new window of fun that's further enhanced by the medium volatility of this game. This video slot is quite a spinner of wins. Just go with the flow and let the Mayan gods show the way to play.

The scatter will trigger a win, but also a CARD FLIP game, that gives you 8 chances to predict which way the cards will flip. Get it wrong you're out. Guess it right, you keep winning. The GOD FACED dice, on the other hand, will grant you a meeting with the CHIEF. He's quite a character, smoking his traditional pipe occasionally. He will present a series of cups, under which, precious stones are hidden. Three will be revealed, then its up to you to decide whether the number of precious stones, below the other cups, is higher or lower. Guess wrong, you're out. Guess right, you keep playing and winning.
